REASONS FOR ALLOWANCE

1. This Office Action is responsive to the Amendment filed on 12/12/05.
2. Claims 1-5, 8-16 and 18-24 are allowed.
3. The following is an examiner's statement of reasons for allowance:

References 5333194, 4203012, 4004109 and 4300023 are cited because they are pertinent to the claimed invention.

-Regarding to independent claim 1, none of prior art of record teaches or suggests an apparatus for receiving data, as claimed. Aoki et al (6,236,696) discloses the claimed invention except that he fails to teach a claimed feature in which a plurality of current sources form differential pairs to convert a differential voltage corresponding to communications of a communication circuit with an edge processor into a differential current. It would not have been obvious for one skilled in the art to implement Aoki et al in view of other prior art of record for leading such the implementation to the claimed invention.

-Regarding to independent claims 8 and 11, none of prior art of record teaches or suggests an apparatus, as claimed. Aoki et al discloses the claimed invention except that he fails to teach a claimed feature in which a plurality of current sources is coupled to an edge-based receiver and converts a plurality of differential voltages into a plurality of differential currents and a plurality of resistors coupled to each of the differential pairs to sum said differential currents to yield a single differential load.. It would not have been obvious for one skilled in the art to implement Aoki et al in view of other prior art of record for leading such the implementation to the claimed invention.

-Regarding to independent claims 19 and 22, none of prior art of record teaches or suggests the method, as claimed. Aoki et al discloses the claimed invention except that he fails to teach a claimed feature comprising procedures of converting a plurality of differential voltages in a plurality of differential pairs into a plurality of differential currents and summing the plurality of differential currents to yield a single differential load. It would not have been obvious for one skilled in the art to implement Aoki et al in view of other prior art of record for leading such the implementation to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
